ANNA UNIVERSITY, CHENNAI

UNDER GRADUATE CURRICULUM (NON-AUTONOMOUS AFFILIATED INSTITUTIONS)

Programme: B.Tech. Agricultural Engineering **Regulations:** 2025

Abbreviations:

HUM – Humanities (Languages, Management, Heritage, and others)

BS – Basic Science (Mathematics, Physics, Chemistry)

ES – Engineering Science (General (**G**), Programme Core (**PC**), Programme Elective (**PE**) & Emerging Technology (**ET**))

SD – Skill Development

SL – Self Learning

CDP – Capstone Design Project

OE – Open Elective

L – Laboratory Course

T – Theory

LIT – Laboratory Integrated Theory

PW – Project Work

IPW – Internship cum Project Work

DIC – Department Introductory Course

TCP – Total Contact Period(s)

Program Outcomes

1. **Engineering Knowledge**: Apply math, science, and engineering fundamentals to complex problems.
2. **Problem Analysis**: Identify and analyze complex problems using research and sustainability principles.
3. **Design Solutions**: Design systems and processes considering health, safety, cost, culture, and environment.
4. **Investigations**: Use experiments, modelling, and data analysis to reach valid conclusions.
5. **Engineering Tools**: Apply modern tools for modelling and problem-solving, recognizing their limits.
6. **Society & Environment**: Assess societal, legal, and environmental impacts of engineering solutions.
7. **Ethics**: Commit to ethics, human values, diversity, and legal compliance.
8. **Teamwork**: Work effectively as an individual and in multidisciplinary teams.

9. **Communication**: Communicate clearly in reports, presentations, and documentation across diverse groups.
10. **Management & Finance**: Apply management and economic principles in projects and teamwork.
11. **Lifelong Learning**: Engage in continuous learning, adapt to new technologies, and think critically.

Program Specific Outcomes (PSOs)

1. To analyze, design, and execute agricultural engineering systems for real-time applications for enhanced productivity and sustainability.
2. Implement modern tools, precision agriculture techniques, and sustainable practices for addressing emerging challenges in agriculture.
3. To upskill with rapid advancements in the field of Agricultural Engineering and demonstrate research aptitude, collaborate effectively in teams and uphold ethical practices.

Programme Elective Courses - Streams

BVG	Farm Machinery	Soil and water conservation and Protected cultivation	Renewable Energy	Agricultural Business management
Refrigeration and cold Storage	Farm Power and Machinery Management	Watershed planning and Management	Biochemical and Thermo chemical Conversion of biomass	Automation in Agriculture
Food and Dairy Engineering	Testing and Evaluation of Farm Machinery and equipment	Ground water and Well Engineering	Waste and by product utilization	Agri Business Management and Entrepreneurship
Process Engineering of Fruits and Vegetables	Design Of Agricultural Machinery	Design of Micro-irrigation system	Solar and Wind energy system	Sustainable Agriculture and Food Security
Storage and Packaging Technology	Hydraulic Drives and Controls	Protected Cultivation	Energy Auditing	Systems Analysis in Agricultural Engineering
Food Process Equipment and Design	Human Engineering and Safety in Farm Machinery Operations	Landscape Irrigation Design	Cogeneration And Waste Heat Recovery Systems	UAV and its applications in Agriculture
Food Safety Management Systems	Precision Farming Equipment	Irrigation Water Quality and Waste Water Management	Energy Conservation In Agro Based Industry	IT in Agricultural Systems
Emerging Technologies in Food Processing	Ergonomics and Safety in Farm Operations	Climate change and Adaptation	Biomass Conversion and Biorefinery	Landscape architecture

Semester – I

MA25C01	Applied Calculus	L	T	P	C
		3	1	0	4

Course Objectives:

- To provide technical competence of modelling engineering problems using calculus.
- To apply the calculus concepts in solving engineering problems using analytical methods and computational tools.

Differential Calculus: Functions, graph of functions, New functions from old functions, Limit of a function, Continuity, Limits at infinity, Derivative as a function, Maxima and Minima of functions of single variable, Mean value theorem, Effect of derivatives on the shape of a graph.

Activities: Visualization of the functions, Maxima and Minima of a function using open-source software, Solving of Competitive Examination questions (Ex. GATE).

Functions of Several Variables: Partial derivatives, Chain rule, Total derivative, Maxima and minima of functions of two variables, Method of Lagrange's Multipliers, Application problems in engineering.

Activities: Partial Derivatives with two or three variables, Maxima and Minima of a function using open-source software, Solving of Competitive Examination questions (Ex. GATE).

Integral Calculus: Fundamental theorem of Calculus, Indefinite integrals and the Net Change Theorem, Improper integrals, Arc Length, Area of Region, Area of surface of revolution.

Activities: Definite and Indefinite Integrals, Determination of Area, Solving of Competitive Examination questions (Ex. GATE).

Multiple Integrals: Iterated integrals and Fubini's theorem, Evaluation of double integrals, change of order of integration, change of variables between Cartesian and polar co-ordinates, evaluation of triple integrals-change of variables between Cartesian and cylindrical and spherical co-ordinates.

Activities: Double integrals and triple integrals using open-source software, Solving of Competitive Examination questions (Ex. GATE).

Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%.

Methodology for Continuous Assessment: Assignments (20%), Solution to application-oriented problems using software (20%), Solving of Competetive Exam questions (20%), Internal Examinations (40%).

	Description of CO	**PO**	**PSO**
CO1	Explain the meaning of derivative, integral, and their geometric and physical interpretations.	---	---
CO2	Apply differentiation and integration techniques to compute maxima, minima, and area.	PO1(3)	PSO1(2) PSO2(2)
CO3	Analyze the behavior of single and multivariable functions using derivatives and partial derivatives.	PO2(3)	PSO1(2) PSO3(1)
CO4	Utilize modern computational software and online platforms to deepen understanding, perform complex calculations, and visualize mathematical concepts.	PO5(2) PO11(1)	PSO2(3) PSO3(1)

CE25C01	Introduction to Civil Engineering	L	T	P	C
		3	0	0	3

Course Objective:

- To impart the significance of the Civil Engineering and provide insight to the essentials of components of infrastructure.

Overview of Civil Engineering: Role of civil engineers in society, Ethics in Civil Engineering Practice, outstanding accomplishments of the profession, future trends- Types of projects, stages of projects, specification and scope.

Fields of Civil Engineering: Overview of Structural, Construction, Geotechnical, Environmental, Transportation, Water Resources and Environmental Engineering – Introduction to Engineering Geology and seismology.

Civil Engineering Materials: Civil Engineering Materials: Bricks – Stones – Sand – Cement – Concrete – Steel – Timber, Glass - Modern Materials, Thermal and Acoustic Insulating Materials, Decorative Panels, Water Proofing Materials. Modern uses of Gypsum, Pre-fabricated Building components.

Building Components: Building plans – Setting out of a Building - Foundations: Types of foundations - Bearing capacity and settlement – Brick masonry – Stone Masonry – Beams – Columns – Lintels – Roofing – Flooring – Plastering- NBC.

Infrastructure:

Types of Bridges and Dams – Water Supply Network - Rain Water Harvesting – Solid Waste Management system- Introduction to Highways and Railways - Introduction to Green Buildings.

Activities:

An Industrial visit to a nearby Civil Engineering Projects.
Seminar / assignment on Emerging Civil Engineering fields.

Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%

Methodology for Continuous Assessment: Quiz (10%), Assignments (40%) and Internal Examinations (50%)

	Description of CO	PO	PSO
CO1	Explain core Civil engineering concepts.	---	---
CO2	Apply basic engineering calculations in Civil Engineering systems.	PO1(3)	PSO1(3) PSO2(1)
CO3	Identify practices followed in infrastructure construction.	PO2(2)	PSO2(2) PSO3(1)

PH25C01	Applied Physics – I	L	T	P	C
		2	0	2	3

Course Objective(s):

- To impart knowledge and expose the essentials of physics in various engineering applications.

Properties of Matter: Elasticity, Cantilever, Young's modulus (non-uniform bending), Girders: Bridges and buildings, Viscosity: Stokes method, Surface tension: drop weight method, Thermal expansion, Thermal stress, Bimetallic strips- Expansion joints

Practical: Non-Uniform bending, Young's modulus of the material, Torsional pendulum, Rigidity modulus of the wire and moment of inertia of the disc.

Activities: Virtual demonstration of thermal stress.

Oscillations: Simple Harmonic motion, Torsional pendulum, Couple per unit twist – Damped and Forced Oscillation

Waves: Waves on a stretched string, Energy and Power, standing waves, Ultrasonics, piezo-electric method, Acoustic grating, Electromagnetic waves: Maxwell equation, Production of EM waves by dipole antenna, Propagation of EM waves in free space, wave equation, Cell phone reception

Practical: Melde's string experiment, Frequency of an electrically vibrating metal tip.

Activities: Virtual demonstration of propagation of EM waves

Quantum Mechanics: Black body radiation, Photoelectric effect, de Broglie hypothesis- Schrodinger Wave equation, Particle in a box (infinite potential well - three-dimensional box), Barrier penetration and quantum tunnelling.

Practical: Photo-electric effect, Determination of Planck's constant.

Activities: Virtual demonstration of Scanning Transmission Electron Microscope

Applied Optics: Interference: Air wedge, Michelson's Interferometer, Fiber optics: Structure of a fiber, Fiber Optic Communication System, Fiber Sensors (Virtual demo), Displacement, pressure sensor and Temperature sensor, Einstein Co-efficient, Nd:YAG laser, CO_2 laser (construction, functioning and applications), dye laser

Practical: Ruling width of Compact disc using Laser, Thickness of a thin sheet/wire using Air wedge Method.

Activities: Demonstration of sensors and applications of Lasers

Weightage: Continuous Assessment: 50%, End Semester Examinations: 50%

Methodology for Continuous Assessment: Quiz (5%), Assignments (20%), Flipped Class (5%), Practical (30%), Internal Examinations (40%)

	Description of CO	PO	PSO
CO1	Explain the physics concepts in various applications.	---	---
CO2	Apply the principles of wave optics and laser physics in practical systems.	PO1(3)	PSO1(2) PSO2(2)
CO3	Analyse the behaviour of materials under different conditions.	PO2(2)	PSO1(2) PSO3(1)
CO4	Conduct experiments in groups and interpret the data.	PO4(3) PO8(1)	PSO1(2) PSO2(2)

CY25C01	Applied Chemistry – I	L	T	P	C
		2	0	2	3

Course Objectives:

- To provide students with a solid understanding of the chemical principles for engineering applications.
- To introduce the chemical properties of materials and how these properties influence the selection and use of materials in engineering systems.
- To impart practical applications of chemistry in commonly used engineering devices

Water Technology: Water quality parameters and standards. Industrial feed water – Remediation. Municipal water treatment. Desalination.

Practical: Analysis of alkalinity, hardness and dissolved oxygen.

Activity: Coagulation of water sample using Alum

Nano-chemistry: Classification, Size-dependent properties. Preparation of nanomaterials – Top-down and Bottom-Up approaches, Applications (Flipped classroom).

Practical: Preparation of nanoparticles by Sol-Gel method.

Electrochemistry: Electrochemical cell, Electrode potential, Redox reaction. Conductivity of electrolytes – Factors.

Practical: Conductometric titrations

Activity: Electrochemical cell demonstration

Corrosion & Control: Chemical and electrochemical corrosions, galvanic series, factors influencing corrosion, Electrochemical protection. Organic and Inorganic coating.

Practical: Corrosion study by weight loss and salt spray method, Potentiometry/UV-visible spectrophotometer.

Activities: Case Study on Corrosion in Pipelines and Electronics, Control measures for a corroded metal.

Batteries: Conventional, Contemporary and Emerging battery storage technologies, Primary & Secondary Batteries, Battery Pack, Battery Materials, Performance Parameters, Testing, Safety aspects.

Practical: Measurement of EMF, Internal Resistance, Charge and Discharge Characteristics.

Activities: Demonstration of battery pack in e-vehicles.

Weightage: Continuous Assessment: 50%, End Semester Examinations: 50%

Methodology for Continuous Assessment: Quiz (5%), Assignments (20%), Flipped Class (5%), Practical (30%), Internal Examinations (40%)

	Description of CO	PO	PSO
CO1	Understand the importance of chemistry applications with underlying mechanisms.	---	
CO2	Apply the chemistry concepts in widely used devices.	PO1(3)	PSO1(2) PSO2(2)
CO3	Analyse the effect of various chemical parameters on performance of engineering systems.	PO2(2)	PSO1(2) PSO2(1)
CO4	Perform experimentations as a group and interpret the results.	PO4(3) PO8(1)	PSO2(2) PSO3(2)
CO5	Communicate findings through case studies and reports	PO9(1)	PSO2(2) PSO3(3)

ME25C01	Engineering Drawing	L	T	P	C
		2	0	4	4

Course Objectives:

- To impart knowledge on dimensions and drawing standards.
- To explore the orthographic projection of lines and solids.
- To provide the understanding of orthographic, isometric and perspective views.

Fundamentals: Drawing instruments, Drawing standards (BIS), Lettering in engineering, Sheet layout, elements of dimensioning, Systems of dimensioning. Free hand sketching of 2D & 3D objects, Conics – Ellipse, Parabola and Hyperbola.

Activities: Virtual Demonstration of Conics and Cycloids.

Orthographic Projection: First angle projection, Projection of points, straight lines and planes.

Projection of Solids: Simple Solids, Section of Solids, Development of Surfaces

Activities: Development of models of various solids and virtual demonstration of sectioning, CAD modelling of 2D objects.

Isometric Projection: Isometric Scale, Projection of Simple solids.

Activities: Conversion of 3D into 2D orthographic views, CAD modelling of 3D objects.

Perspective Projection: Simple solids projection

Activities: Virtual demonstration of perspective views.

Project: Development of 2D objects and 3D objects using CAD tools.

Weightage:
Continuous Assessment: 50%
End Semester Examinations: 50%

Methodology for Continuous Assessment:
Project – 10%, Models - 5%, Assignments - 35% and Internal Examinations - 50%

UC25H01	தமிழர் மரபு	L	T	P	C
		1	0	0	1

மொழி மற்றும் இலக்கியம்: இந்திய மொழிக் குடும்பங்கள், திராவிட மொழிகள், தமிழ் ஒரு செம்மொழி, தமிழ் செவ்விலக்கியங்கள், சங்க இலக்கியத்தின் சமயச் சார்பற்ற தன்மை, சங்க இலக்கியத்தில் பகிர்தல் அறம், திருக்குறளில் மேலாண்மைக் கருத்துக்கள், தமிழ்க் காப்பியங்கள், தமிழகத்தில் சமண பௌத்த சமயங்களின் தாக்கம், பக்தி இலக்கியம், ஆழ்வார்கள் மற்றும் நாயன்மார்கள், சிற்றிலக்கியங்கள், தமிழில் நவீன இலக்கியத்தின் வளர்ச்சி, தமிழ் இலக்கிய வளர்ச்சியில் பாரதியார் மற்றும் பாரதிதாசன் ஆகியோரின் பங்களிப்பு.

மரபு – பாறை ஓவியங்கள் முதல் நவீன ஓவியங்கள் வரை – சிற்பக் கலை:நடுகல் முதல் நவீன சிற்பங்கள் வரை, ஐம்பொன் சிலைகள், பழங்குடியினர் மற்றும் அவர்கள் தயாரிக்கும் கைவினைப் பொருட்கள், பொம்மைகள் , தேர் செய்யும் கலை, சுடுமண் சிற்பங்கள், நாட்டுப்புறத் தெய்வங்கள், குமரிமுனையில் திருவள்ளுவர் சிலை, இசைக் கருவிகள், மிருதங்கம், பறை, வீணை, யாழ், நாதஸ்வரம், தமிழர்களின் சமூக பொருளாதார வாழ்வில் கோவில்களின் பங்கு.

நாட்டுப்புறக் கலைகள் மற்றும் வீர விளையாட்டுகள்: தெருக்கூத்து, கரகாட்டம், வில்லுப்பாட்டு, கணியான் கூத்து, ஒயிலாட்டம், தோல்பாவைக் கூத்து, சிலம்பாட்டம், வளரி, புலியாட்டம், தமிழர்களின் விளையாட்டுகள்.

தமிழர்களின் திணைக் கோட்பாடுகள்: தமிழகத்தின் தாவரங்களும், விலங்குகளும், தொல்காப்பியம் மற்றும் சங்க இலக்கியத்தில் அகம் மற்றும் புறக் கோட்பாடுகள், தமிழர்கள் போற்றிய அறக்கோட்பாடு, சங்ககாலத்தில் தமிழகத்தில் எழுத்தறிவும், கல்வியும், சங்ககால நகரங்களும் துறை முகங்களும், சங்ககாலத்தில் ஏற்றுமதி மற்றும் இறக்குமதி, கடல்கடந்த நாடுகளில் சோழர்களின் வெற்றி.

இந்திய தேசிய இயக்கம் மற்றும் இந்திய பண்பாட்டிற்குத் தமிழர்களின் பங்களிப்பு: இந்திய விடுதலைப்போரில் தமிழர்களின் பங்கு, இந்தியாவின் பிறப்பகுதிகளில் தமிழ்ப் பண்பாட்டின் தாக்கம் , சுயமரியாதை இயக்கம் இந்திய மருத்துவத்தில், சித்த மருத்துவத்தின் பங்கு, கல்வெட்டுகள், கையெழுத்துப்படிகள், தமிழ்ப் புத்தகங்களின் அச்சு வரலாறு.

UC25H01	Heritage of Tamils	L	T	P	C
		1	0	0	1

Language and Literature: Language Families in India, Dravidian Languages, Tamil as a Classical Language, Classical Literature in Tamil, Secular Nature of Sangam Literature, Distributive Justice in Sangam Literature, Management Principles in Thirukural, Tamil Epics and Impact of Buddhism & Jainism in Tamil Land, Bakthi Literature Azhwars and Nayanmars, Forms of minor Poetry - Development of Modern literature in Tamil - Contribution of Bharathiyar and Bharathidhasan.

Heritage - Rock Art Paintings to Modern Art – Sculpture: Hero stone to modern sculpture, Bronze icons, Tribes and their handicrafts, Art of temple car making, Massive Terracotta sculptures, Village deities, Thiruvalluvar Statue at Kanyakumari, Making of musical instruments, Mridhangam, Parai, Veenai, Yazh and Nadhaswaram, Role of Temples in Social and Economic Life of Tamils.

Folk and Martial Arts: Therukoothu, Karagattam, Villu Pattu, Kaniyan Koothu, Oyillattam, Leatherpuppetry, Silambattam, Valari, Tiger dance, Sports and Games of Tamils.

Thinai Concept of Tamils: Flora and Fauna of Tamils & Aham and Puram Concept from Tholkappiyam and Sangam Literature, Aram Concept of Tamils, Education and Literacy during Sangam Age, Ancient Cities and Ports of Sangam Age, Export and Import during Sangam Age, Overseas Conquest of Cholas.

Contribution of Tamils to Indian National Movement and Indian Culture:

Contribution of Tamils to Indian Freedom Struggle, The Cultural Influence of Tamils over the other parts of India, Self-Respect Movement, Role of Siddha Medicine in Indigenous Systems of Medicine, Inscriptions & Manuscripts, Print History of Tamil Books

EN25C01	English Essentials – I	L	T	P	C
		2	0	0	2

Course Objectives:

- Enhance learners' listening and speaking skills to understand and deliver speeches effectively
- Equip students with the skills to write clear, coherent, and grammatically correct texts for various purposes.
- Strengthen the ability to comprehend, interpret, and analyse written English across diverse contexts.

Speaking Skills: Self-Introduction (Tenses, Adjectives) Expressing opinions (Subject-Verb Agreement), Participating in Conversations (Speech Acts - agreeing & disagreeing – synonyms and antonyms**)**

Suggested Activities: Self-Introduction, Just a Minute (JAM) Video recording, Situational role plays, Spell Bee, Word Substitution, Usage of Apps.

Listening Skills: Listening to Simple Conversations (Understanding tone and intent), Short Speeches / Stories, Extracting information, Pronunciation, Listening to Various Accents.

Suggested Activities: Listening and Repeating, Gap fill exercises, Note-taking

Reading Skills: Reading Strategies – (Skimming, scanning, predicting) intensive reading - short passages and long passages on suggested themes (Sentence Patterns, Prefixes and suffixes, idioms and phrases).

Activities: Reading - newspaper and digital articles, Cloze, Reading comprehension, note making and summarising,

Writing Skills: Word Substitution, Sentence Formation, Hints Development (Guided Writing), Writing Different Types of Paragraphs - (Sentence Structure) – Letter Writing / Emails (Informal)

Activities: Error Detection, Picture and poster description, Descriptive, Narrative and Comparative paragraphs, Brainstorming and Mind Mapping - Informal letters/ Emails

Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%

Methodology for Continuous Assessment: Quiz (10%), Assignments (20%), Speaking Task (10%), Reading Task (10%), Writing Task (10%), Internal Examinations (40%).

	Description of CO	**PO**	**PSO1**
CO1	Listen and comprehend spoken English, take and draft notes.	---	---
CO2	Apply vocabulary and grammar appropriately to communicate in written and spoken forms.	PO1(3)	PSO1(2) PSO3(3)
CO3	Analyze texts in different contexts using appropriate reading strategies.	PO2(2)	PSO2(1)
CO4	Communicate thoughts and ideas in real life situations.	PO9(2)	PSO3(2)
CO5	Develop communication skills relevant to engineering and technology.	PO11(1)	PSO3(3)

CS25C02	Computer Programming: Python	L	T	P	C
		2	0	2	3

Course Objectives:

- To equip engineering students with the foundational knowledge and practical skills in Python programming to analyse and solve computational problems effectively.
- To foster problem-solving, critical thinking, and modular programming skills essential for engineering domains.

Introduction to Python: Problem Solving, Problem Analysis Chart, Developing an Algorithm, Flowchart and Pseudocode, Interactive and Script Mode, Indentation, Comments, Error messages, Variables, Reserved Words, Data Types, Arithmetic operators and expressions, Built-in Functions, Importing from Packages.

Practical: Problem Analysis Chart, Flowchart and Pseudocode Practices. (Minimum three)

Control Structures: if, if-else, nested if, multi-way if-elif statements, while loop, for loop, nested loops, pass statements.

Practical: Usage of conditional logics in programs. (Minimum three)

Functions: Hiding redundancy, complexity; Parameters, arguments and return values; formal vs actual arguments, named arguments, Recursive & Lambda Functions.

Practical: Usage of functions in programs. (Minimum three)

Strings & Collections: String Comparison, Formatting, Slicing, Splitting, Stripping, Lists, tuples, and dictionaries, basic list operators, searching and sorting lists; dictionary literals, adding and removing keys, accessing and replacing values.

Practical: String manipulations and operations on lists, tuples, sets, and dictionaries. (Minimum three)

File Operations: Create, Open, Read, Write, Append and Close files. Manipulating directories, OS and Sys modules, reading/writing text and numbers, from/to a file; creating and reading a formatted file (csv, tab-separated, etc.).

Practical: Opening, closing, reading and writing in formatted file format and sort data. (Minimum three)

Packages: Built-in modules, User-Defined modules, Numpy, SciPy, Pandas, Scikit-learn**.**

Practical: Usage of modules and packages to solve problems. (Minimum three), Project (Minimum Two)

Weightage: Continuous Assessment: 50%, End Semester Examinations: 50%

Methodology for Continuous Assessment: Quiz (5%), Project (15%), Assignment Programs (25%), Practical (25%), Internal Examinations (30%)

ME25C04	Makerspace	L	T	P	C
		0	0	4	2

Course Objectives:

1. To impart practical skills in the assembly, disassembly, and welding of components using appropriate tools and techniques.
2. To provide hands-on training in electrical wiring practices, and the use of electronic components, sensors, and actuators.

List of Activities

(A). Dis-assembly & Assembly Practices

i. Tools and its handling techniques.
ii. Dis-assembly and assembly of home appliances – Grinder Mixer Grinder, Ceiling Fan, Table Fan & Washing Machine.
iii. Dis-assembly and assembly of Air-Conditioners & Refrigerators.
iv. Dis-assembly and assembly of a Bicycle.

(B). Welding Practices

i. Welding Procedure, Selection & Safety Measures.
ii. Power source of Arc Welding – Gas Metal Arc Welding & Gas Tungsten Arc Welding processes.
iii. Hands-on session of preparing base material & Joint groove for welding.
iv. Hands-on session of MAW, GMAW, GTAW, on Carbon Steel & Stainless Stell plates / pipes, for fabrication of a simple part.

(C). Electrical Wiring Practices

i. Electrical Installation tools, equipment & safety measures.
ii. Hands-on session of basic electrical connections for Fuses, Miniature Circuit Breakers and Distribution Box.
iii. Hands-on session of electrical connections for Lightings, Fans, Calling Bells.
iv. Hands-on session of electrical connections for Motors & Uninterruptible Power Supply.

(D). Electronics Components / Equipment Practices

i. Electronic components, equipment & safety measures.
ii. Dis-assembly and assembly of Computers.
iii. Hands-on session of Soldering Practices in a Printed Circuit Board.
iv. Hands-on session of Bridge Rectifier, Op-Amp and Transimpedance amplifier.
v. Hands-on session of integration of sensors and actuators with a Microcontroller.
vi. Demonstration of Programmable Logic Control Circuit.

(E). Contemporary Systems

i. Demonstration of Solid Modelling of components.
ii. Demonstration of Assembly Modelling of components.
iii. Fabrication of simple components / parts using 3D Printers.
iv. Demonstration of cutting of wood / metal in different complex shapes using Laser Cutting Machine.

CO2	Carry out electrical wiring installations and repairs, applying safety measures in domestic applications.	PO1(3)	PSO2(1)
CO3	Develop solid innovative models through software.	PO5(2)	PSO2(2)
CO4	Adapt and follow safety protocols in the work environment.	PO11(2)	PSO3(2)

UC25A01	Life Skills for Engineers – I	L	T	P	C
		1	0	2	1

Course Objectives

- To equip engineering students with essential life skills encompassing personal and emotional development, effective management of time and stress, financial literacy, digital safety, and civic responsibility.
- To enhance self-awareness, interpersonal skills, and resilience to prepare students for the professional and personal challenges of engineering careers and life beyond academics**.**

Personal and Emotional Development: Self-Awareness & Personality, Emotional Intelligence & Empathy, Positive thinking, Right attitude, Stress & Anger Management, Goal-Setting & Time Management, Growth Mindset & Resilience.

Activities: Personality tests (MBTI, DISC), reflection journals, Empathy circle, role-playing difficult conversations, Guided mindfulness sessions, stress relief toolkit creation, Vision board creation, weekly time audit and planner, Group challenge scenarios, resilience journal

Management Skills: Financial Literacy: Budgeting & Saving, Nutrition, Health, and Hygiene, Digital Literacy & Online Safety, Civic Responsibility & Ethics

Activities: Create a monthly budget, financial simulation game, Meal planning workshop, physical wellness challenge, Social media audit, privacy and safety scenarios, Community service, values debate.

Weightage: Continuous Assessment: 100%

Methodology for Continuous Assessment: Assignments (20%), Flipped Class & Worksheets (10%), Practical (30%), Internal Examinations (40%)

UC25A02	Physical Education - I	L	T	P	C
		0	0	4	1

Course Objectives:

- To impart the fundamentals of physical education for development of students' physical, mental, and social well-being.
- To instill a lifelong appreciation for physical activity towards the development of positive attitude and fostering values of team work and sportsmanship.

Introduction to physical education: Exercise for Good Posture – Conditioning and Calisthenics for Before start, Jogging, Bending, Twisting, Standing, Sitting and Relaxation, Training on First Aid Practices.

Participation of athletic events: Rules and regulations of important athletic events, Sprint, Jumps, Throws and Hurdles.

Skill development in any one of the following outdoor games: Basket Ball, Volley Ball, Ball Badminton, Football, Hockey, Kho-Kho, Kabaddi, Cricket, Hand ball and Tennis.

Skill development in any one of the following indoor games: Shuttle Badminton, Chess and Table Tennis.

Weightage: Continuous Assessment: 100%

Methodology for Continuous Assessment: Attendance (60%), Quiz (10%), Participation in Sports and Games (20%) and Viva Voce (10%)

	CO Description	PO	PSO
CO1	Understand and explain the importance of physical activity for mental and physical health.	---	---
CO2	Apply basic principles of exercise science in the routine life.	PO1(3)	PSO1(1)
CO3	Develop teamwork, discipline, and leadership through sports and group activities and collaborate effectively.	PO8(3)	PSO3(2)
CO4	Demonstrate independent learning in health, nutrition, and fitness-related topics.	PO11(2)	PSO3(2)

Semester II

MA25C02	Linear Algebra	L	T	P	C
		3	1	0	4

Course Objectives:

- To impart foundational knowledge in linear algebra essential for analysing and solving problems in engineering applications.
- To provide the knowledge on computation using software and interpret key linear algebra concepts using software.

Vector Spaces Introduction to Vector Spaces, Examples, Subspaces, Linear Combinations, Span, Generating Sets, Linear Dependence and Independence, Basis and Dimension, Dimension of Subspaces.

Activities: Open-Source software, exercises to test linear dependence and independence using rank, compute span and basis of a set of vectors, determine the dimension of subspaces, and illustrate the concept of subspace and basis in $\boldsymbol{R^2/R^3}$ with visualization.

Linear Transformations and Diagonalization: Null space, Range, Dimension Theorem (statement only), Matrix representation of a linear transformation, Eigenvalues & Eigenvectors, Diagonalizability.

Activities: Open-Source software, exercises to compute the matrix representation of a linear transformation, find the null space and range of a matrix, and compute eigenvalues and eigenvectors of a matrix.

Inner Product Spaces: Inner product, Norms, Cauchy, Schwarz inequality, Gram, Schmidt orthogonalization, Simple problems (up to $\boldsymbol{R^3}$).

Activities: Open-Source software, exercises to compute inner products and vector norms.

Matrix Decomposition: Orthogonal transformation of a symmetric matrix to diagonal form - Positive definite matrices, QR decomposition, Singular Value Decomposition (SVD), Least squares solutions- simple problems (up to $3 \times 3\ matrices$).

Activities: Open-Source software, exercises to check if a matrix is positive definite, perform QR decomposition and SVD using built-in functions.

Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%.

Methodology for Continuous Assessment: Assignment (20%), Software activity (20%), Quiz (20%), Internal Examinations (40%).

	Description of CO	PO	PSO
CO1	Explain the fundamental concepts of Linear Algebra.	---	
CO2	Compute and interpret eigenvalues and eigenvectors.	PO1(3)	PSO1(2)
CO3	Apply inner product concepts and perform orthogonalization.	PO1 (3)	PSO1(1)
CO4	Compute least squares solutions of linear system of equations.	PO1 (2) PO2 (2)	PSO3(1)
CO5	Use MATLAB to implement and validate key linear algebra concepts	PO5 (1) PO11 (1)	PSO2(2)

ME25C02	Engineering Mechanics	L	T	P	C
		3	1	0	4

Course Objectives:

- To introduce the fundamental concepts and principles of statics related to forces acting on particles and rigid bodies.
- To develop the ability to formulate and apply equilibrium equations for particles and rigid bodies in two and three dimensions.
- To enable students to analyse force systems through vector resolution and calculation of moments and couples.

Statics of Particles: Resultant of forces in a plane, Equilibrium of a particle in a plane, Addition of concurrent forces in space, Equilibrium of a particle in space.

Activities: Assignments and Quiz on resultant forces, Solving of Competetive Exam questions.

Statics of Rigid Bodies: Concept of Free Body Diagram, Equivalent systems of forces, Transmissibility, Moment of a force about a point and an axis, Couples and force-couple systems, Equilibrium of rigid bodies in two and three dimensions, Principle of virtual work.

Activities: Virtual demonstration of rigid bodies, Solving of Competetive Exam questions.

Moments of Inertia: First moments of areas and lines, Centroids of composite areas and lines, Theorems of Pappus-Guldinus, Second moment of area, Parallel axis theorem, Rectangular and Polar Moments of inertia of composite areas, Radius of Gyration, Product of Inertia, Principal Axes and Principal Moments of Inertia, Mass moments of inertia of thin plates.

Activities: Virtual Simulation of Moment of Inertia, Principal Axes Determination, Solving of Competetive Exam questions.

Friction: Laws of friction, Coefficients of Friction, Angles of Friction, Types of Friction Problems, Wedges and Ladder friction, Belt friction.

Activities: Virtual Demonstration of Friction in belts and pulleys, Solving of Competetive Exam questions

Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%

Methodology for Continuous Assessment: Quiz - 10%, Assignments - 20%, Solving of Competetive Exam questions (20%) and Internal Examinations - 50%

	CO Description	PO	PSO
CO1	Explain the principles of statics in determination of forces acting on particles and rigid bodies.	---	---
CO2	Apply equilibrium conditions to predict the behaviour of particles and rigid bodies under various force configurations	PO1(3)	PSO1(3)
CO3	Analyse various systems through resolution of forces and moments.	PO2(2)	PSO1(2)
CO4	Demonstrate the ability to engage in adapting new techniques in the analysis of force and moments in a system.	PO11(1)	PSO2(2) PSO3(1)

PH25C02	Applied Physics (CE) – II	L	T	P	C
		2	1	0	3

Course Objectives:

- To provide a comprehensive understanding of physics concepts in Civil engineering applications.

Mechanic: Elasticity – Types of supports and loads – free body diagrams - Equilibrium of rigid bodies – Types of structures: Beams, frames, trusses – Analysis of trusses – internal forces in members – Moment of inertia and bending- cantilever

Activities: Virtual Demonstration of deflection of beams and moment of inertia.

Acoustics: Reverberation – Loudness – Focusing – Echelon – Noise – Echo - Resonance – Interference – Sabine's formula (Derivation) – Absorption coefficient – Sonometer - Sound insulation.

Activities: Virtual Demonstration of sound insulation and resonance.

Lighting: Visual field glare, colour – day light calculations – day light design of windows, measurement of day light and use of models and artificial skies - artificial lighting – LED characteristics.

Activities: Virtual Demonstration of heat infiltration in glass, glass as building material, LED Characteristics.

Engineering Materials: Composites – Fibre Reinforced Plastics (FRP) – Fiber Reinforced Metals (FRM) – Fiber Reinforced Bricks (FRB) - Shape memory alloys – Ceramics – Thermal, Mechanical, Electrical and Chemical properties –3D printed construction materials - Nano materials.

Activities: Demonstration of 3D printing of materials, Composite fabrication.

Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%

Methodology for Continuous Assessment: Quiz (10%), Assignments (30%), Flipped Class (10%), Internal Examinations (50%)

EE25C01	Basic Electrical and Electronics Engineering	L	T	P	C
		3	0	0	3

Course Objectives:

- To impart foundational knowledge in principles and applications of electrical and electronics engineering.

DC Fundamentals: Current and Voltage sources, Resistance, Inductance and Capacitance; Ohm's law, Kirchhoff's law, Series parallel combination of R, L and C components, Voltage Divider and Current Divider Rules.

Activities: Virtual Demonstration of electrical laws & circuits, Hands-on Breadboarding, Solving Competetive Exam questions.

AC Fundamentals: Faraday's Laws of Electro-magnetic Induction, Definition of Self and Mutual Inductances, Generation of sinusoidal voltage, Instantaneous & RMS values of sinusoidal signals, Introduction to 3-phase systems, Electrical Safety, Fuses and Earthing.

Activities: Virtual Demonstration of electromagnetic induction, Measurement of instantaneous and RMS values of AC signals, Solving Competetive Exam questions.

Electric Machines: DC Machines, Transformers, Star and delta Connections, Three phase Induction motors, Synchronous Generators, Single Phase Induction Motors, Stepper Motor, Universal Motor and BLDC motor.

Activities: Virtual demonstration of step-up and step-down transformers, Virtual working models of Universal and BLDC motors, Solving Competetive Exam questions.

Semiconductor Devices: PN junction diodes, Zener Diode, Voltage regulator, BJT & FET Transistors, Timers, Operational Amplifiers.

Activities: Virtual demonstration of V-I characteristics of PN junction and Zener diodes using simulation, inverting/non-inverting amplifiers, Solving Competetive Exam questions.

Digital Electronics: Boolean algebra, Basic and Universal Gates, adders, multiplexers, demultiplexers and flip-flops.

Activity: Online logic Competetive Exam simulators, Solving Competetive Exam questions.

Microcontrollers: Introduction, Architecture, Potential Applications.

Activities: Physical demonstration of a microcontroller and online simulation of microcontroller.

Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%

Methodology for Continuous Assessment: Quiz (5%), Assignments (25%), Competetive Exam Questions (20%), Internal Examinations (50%)

CY25201	Applied Chemistry (CE-Agri) – II	L	T	P	C
		2	0	0	2

Course Objectives

- To impart knowledge in chemical properties that govern soil composition, fertility, and environmental interactions in the field of agriculture.

Soil: Composition, Nutrition, water content, Ion exchange, Soil acidity, Reclamation.

Activities: Determination of chemical content in various types of soils.

Fertilizers: Types, Nitrogen, Potassium, Phosphorus Fertilizers, Raw materials, Manufacturing process, controlled release.

Activities: Determination of nutrient content in various fertilizers.

Pesticides: Classification, Mineralization & Metabolism, Impact on environment, Biodegradation of pesticides

Toxicology: Types, Biochemical effects, Toxicological properties, Green Chemistry in Agriculture.

Activities: Studies on toxicity effects in soil.

Analytical Methods: Introduction, TOC, CHNS, GC-MS and LC-MS

Activities: Pesticide residue analysis, virtual demonstration of various analytical techniques.

Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%

Methodology for Continuous Assessment: Quiz (5%), Assignments (20%), Flipped Class (5%), Virtual Practice (20%), Internal Examinations (50%)

AI25201	Principles and Practices of Crop Production	L	T	P	C
		3	0	0	3

Course Objectives:

- To impart fundamentals of crop productions and familiarize the major factors and methods in crop management.
- To provide insight into various techniques for production of agro-products.

Agriculture and Crop Production: Introduction to agriculture and its crop production sub-sectors - field crop production and horticulture; Factors affecting crop growth and production: genetic (internal) and environmental (external) factors; Crop management through environmental modification and adaptation of crops to the existing environment through crop cultural practices.

Activities: Identification of field and horticultural crops.

Crop Selection and Establishment: Regional and seasonal selection of crops; Systems of crop production; Competition among crop plants; Spacing and arrangement of crop plants; Field preparation for crops, including systems of tillage; Establishment of an adequate crop stand and ground cover, including selection and treatment of seed, and nursery growing.

Activities: Nursery, demonstration on different types in the field, estimation of seed rate, germination of seeds.

Crop Management: Crop water Management; Crop nutrition management, need for supplementation to soil supplied nutrients, sources, generalized recommendations, methods, and timing of application of supplemental nutrients including fertigation scheduling; Crop protection including management of weeds, pests, and pathogens; Integrated methods of managing water, nutrients, and plant protection; Types and methods of harvest.

Activities: Estimation of Fertilizer dose**,** Weedicide uses and caution, Demonstration of IPM methods

Production Practices of Agricultural Crops: Generalized management and cultivation practices for important groups of field crops in Tamil Nadu: cereal crops, grain legumes, oil seed crops, sugarcane, and fiber crops, and special purpose crops such as those grown for green manure and fodder.

Activities: Harvesting methods for various field and horticultural crops

Production Practices of Horticultural Crops: Important groups of horticultural crops in Tamil Nadu such as vegetable crops, fruit crops, flower crops; Cultivation practices of representatives of each group; Special features of production of horticultural crops - green house cultivation.

Activities: Field Visits – Minimum two visits.

Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%
Methodology for Continuous Assessment: Quiz (10%), Field Visits (10%), Assignments (30%) and Internal Examinations (50%)

	CO Description	PO	PSO
CO1	Describe the concepts of crop production with major influencing factors in core agricultural engineering.	---	
CO2	Apply and select appropriate methods for enhanced crop production.	PO1(3)	PSO1(2) PSO2(1)
CO3	Identify, compare and assess suitable cultivation practices through field visits	PO1(2) PO2 (2) PO6 (1)	PSO2(1) PSO3(2)
CO4	Develop a multidisciplinary approach in the field of agriculture.	PO11(1)	PSO1(2) PSO3(1)

EN25C02	English Essentials – II	L	T	P	C
		1	0	2	2

Course Objectives

- Enable learners to improve fluency and accuracy in spoken and written communication.
- Develop learners' ability to articulate ideas clearly and effectively in formal and informal spoken interactions.
- Help learners construct well-organised written documents relevant to academic and workplace contexts.

Oral Communication: Types (Verbal and Nonverbal), Interpersonal and group communication, Telephonic conversation.

Suggested Activities: Short presentations, Debates, Formal Speeches (Welcome, Vote of Thanks and introducing guests), Listen and respond to short podcasts.

Business Correspondence: Email Communication, Formal Letters (Types), Business Meeting.

Suggested Activities: Email and letter writing (Complaint, request, permission), Agenda, minutes of the meeting.

Academic Writing: Paraphrasing, Summarizing, Essay Writing, Instructions and Recommendations.

Suggested Activities: Essay writing (Cause and effect, argumentative, persuasive), User guides/ manuals, policy document.

Team Work: Leadership Skills (Team building, Team Leader, Team player), Negotiation and Problem solving skills

Suggested Activities: SWOT Analysis, Brainstorming and Group discussions.

Weightage: Continuous Assessment: 50%, End Semester Examinations: 50%

Methodology for Continuous Assessment: Worksheets (10%), Group Activity (20%), Report Writing (20%), Internal Examinations (50%)

	Description of CO	PO	PSO
CO1	Understand the importance of communication and drafting skills in engineering and technology.	---	
CO2	Apply listening strategies to comprehend spoken English in various contexts.	PO1(3)	PSO3(2)
CO3	Participate actively in group discussions by analysing critically from different views.	PO2(2) PO8(1)	PSO3(3)
CO4	Create written reports coherently for various purposes.	PO9(2)	PSO3(2)
CO5	Adapt communication styles to global, multicultural environments.	PO11(1)	PSO2(2)

ME25C05	Re-Engineering for Innovation	L	T	P	C
		0	0	4	2

Course Objectives:

- To cultivate foundational skills in prototyping, and automation for development of prototypes with real-world applications.
- To provide a comprehensive, hands-on exposure to product development through reverse engineering concepts.

Bootcamp 1: Introduction to Product Development, Reverse Engineering, Overview of the product lifecycle, Hands-on disassembly of simple products, Practice of basic measurements and sketching, Introduction to CAD modeling of disassembled parts, Virtual assembly of parts.

Bootcamp 2: Embedded System Programming (Open-source platforms), Practice of interfacing sensors, reading data, automation in home, healthcare and agriculture.

Reverse Engineering: Sketch and prototype alternative designs, Group brainstorming sessions, Manufacture prototype parts using 3D printing and / or workshop tools, Assemble prototype product.

Weightage: Continuous Assessment: 60%, End Semester Examinations: 40%

Methodology for Continuous Assessment: Project (30%), Assignment (10%), Practical (30%), Internal Examinations (30%)

	Description of CO	PO	PSO
CO1	Understand the product development lifecycle, including stages such as concept generation, design, prototyping, and testing.	---	
CO2	Apply reverse engineering techniques to analyze and document existing products.	PO1 (3) PO2 (2)	PSO1(2)
CO3	Collaborate in teams to fabricate prototypes using appropriate tools.	PO5 (2) PO8 (1) PO9 (1)	PSO3(3)
CO4	Engage in independent learning and continuously adapt to emerging technologies in product design	PO11(2)	PSO2(2) PSO3(2)

UC25A03	Life Skills for Engineers – II	L	T	P	C
		1	0	2	1

Course Objectives:

- To impart and cultivate analytical reasoning, innovative thinking, effective collaboration, and ethical leadership to prepare students for complex challenges in professional and personal environments.

Critical Thinking: Creativity, Critical Thinking, Collaboration, Problem Solving, Decision Making, Imagination, Intuition, Experience, Sources of Creativity, Lateral Thinking, Myths of creativity, Critical thinking Vs Creative thinking, Convergent & Divergent Thinking, Critical reading & Multiple Intelligence.

Activities: Two-Brainstorm Method, “30 Circles” Challenge, “Desert Survival” Simulation, Lateral thinking riddles and puzzles, "What If?" Scenario Writing, Fast vs. Slow Thinking Game, Creativity Myth Busters

Problem Solving: Techniques, Six Thinking Hats, Mind Mapping, Forced Connections. Analytical Thinking, Numeric, symbolic, and graphic reasoning. Scientific temperament and Logical thinking.

Activities: Case study analysis, Escape Room challenge.

Leadership: Leadership Styles & Self-Assessment, Communication & Active Listening, Decision-Making & Responsibility, Teamwork & Delegation, Empathy, Integrity & Conflict Management, Vision, Motivation & Goal-Setting.

Activities: Crisis Leadership Simulation, Tower Challenge, Leadership Dilemmas Role-Play, Team Vision Board

Weightage: Continuous Assessment: 100%

Methodology for Continuous Assessment: Assignments (20%), Flipped Class & Worksheets (10%), Practical (30%), Internal Examinations (40%)

	Description of CO	PO	PSO
CO1	Explain the importance of leadership and management skills in life.	---	
CO2	Apply and demonstrate creative thinking techniques to generate innovative solutions.	PO7 (3)	PSO1(1) PSO2(1)
CO3	Exhibit effective collaboration and communication skills through teamwork, active listening, and conflict resolution strategies.	PO8 (2)	PSO3(3)
CO4	Integrate scientific temperament and logical reasoning into c problem solving in engineering and real-world contexts.	PO11 (2)	PSO2(1) PSO3(2)

UC25A04	Physical Education - II	L	T	P	C
		0	0	4	1

Course Objectives:

- To impart knowledge on gymnastic exercises and pressing needs for upskilling in a particular game.

Basic gymnastics exercises: Warming up, Suitable exercise, Lead up games, Safety education, Movement education, Balanced Walk, execution, floor exercise, tumbling/acrobatics, grip, release, swinging, parallel bar exercise, horizontal bar exercise, flic-flac-walk and pyramids.

Upskilling in any one of the athletics: Broad Jump, High Jump, Triple Jump, Relay Sprints, Javelin Throw, Discuss Throw, Shot Put, Short and Long-distance Running.

Advance skills in any one of the indoor/outdoor games, which has been opted by the student in the I semester.

Weightage: Continuous Assessment: 100%

Methodology for Continuous Assessment: Attendance (60%), Quiz (10%), Participation in Sports and Games (20%) and Viva Voce (10%)

	CO Description	PO	PSO
CO1	Understand and explain the importance of physical activity for mental and physical health.	---	
CO2	Apply safety principles and methods during sports activities.	PO1(3)	PSO3(1)
CO3	Develop teamwork, discipline, and leadership through sports and group activities and collaborate effectively.	PO8 (3)	PSO3(2)
CO4	Demonstrate the advanced technical skills and strategic understanding in the game of their interest.	PO11(1)	PSO3(2)

Foreign Language^

UC25F01	Deutsch – I	L	T	P	C
		1	0	2	1

Course Objectives:

- To impart fundamentals of the Deutsch language, including reading, writing systems, pronunciation, and speaking.

Basics & Introduction: German alphabet and pronunciation, Basic greetings and farewells, Introducing yourself and others (Ich heiße…, Wer bist du?), Numbers 1–100 and days of the week, Personal pronouns (ich, du, er, sie…), Sentence structure (SVO word order).

Activities: Alphabet spelling game, short skits, Use color-coded cards for SVO sentences.

Grammar Essentials & Everyday Vocabulary: Present tense of regular verbs (spielen, arbeiten, machen…), Common irregular verbs: sein (to be), haben (to have), gehen, kommen, Articles and gender (der, die, das; ein, eine), Simple questions and negation (nicht, kein), Describing people and things: adjectives and colors, Family, school, food, and common objects vocabulary.

Activities: Conjugate regular and irregular verbs, “Question Chain” game, Create a simple family tree.

Everyday Communication in German: Asking for and giving directions, Telling the time and talking about schedules, Ordering food and drinks at a café or restaurant, Talking about hobbies, weather, and daily routines, Listening to short conversations and responding appropriately, Introduction to German culture and formal/informal language use (du vs Sie).

Activities: Ordering food and drinks, Give directions, Formal / Informal greetings, Do’s and Don’ts.

Weightage: Continuous Assessment: 100%

Methodology for Continuous Assessment: Assignments (30%), Quiz (10%) and Internal Examinations 60%

References:

1. Funk, H., Kuhn, C., & Demme, S. (2015). Menschen A1: Deutsch als Fremdsprache Kursbuch. Hueber Verlag.

	CO Description	PO	PSO
CO1	Understand simple spoken Deutsch in everyday contexts.	---	
CO2	Communicate with widely used Deutsch words effectively.	PO9 (2)	PSO3(2)
CO3	Develop the skills necessary for self-directed learning and continuous improvement in Deutsch language.	PO11 (1)	PSO3(2)

UC25F02	Japanese – I	L	T	P	C
		1	0	2	1

Course Objectives:

- To impart fundamentals of the Japanese language, including reading, writing systems, pronunciation, and speaking.

Writing Systems & Basic Communication: Introduction to Hiragana: vowels, basic characters, reading & writing, Introduction to Katakana: basic characters and usage, Basic greetings and farewells (こんにちは, おはようございます, さようなら), Introducing yourself (名前、出身、年齢), Basic sentence structure: Subject–Object–Verb, Numbers 1–100, days of the week, classroom expressions.

Activities: Flashcard games and writing drills, Self-introduction, Numbers & date-matching, Greeting expressions, Listening to audio.

Grammar & Everyday Vocabulary: Particles: は (wa), を (wo), の (no), へ (e), に (ni), Present tense verbs: です, ます-form conjugation (たべます、のみます), Negative forms: ではありません, ません, Describing people and objects using adjectives (い and な), Question formation: なに、どこ、だれ、いつ, Vocabulary for family, food, colors, and basic actions.

Activities: Verb conjugation drills, Guessing game, Picture description, “Shopping” with food vocab and counters

Conversation & Cultural Etiquette: Talking about routines and schedules (daily verbs, time expressions), Asking and giving simple directions (〜はどこですか？), Ordering food and making polite requests (〜をください、〜をおねがいします), Expressing likes and dislikes (すき・きらい), Listening to short conversations and identifying key phrases, Introduction to formal/informal speech and Japanese etiquette.

Activities: Skits and role-plays, daily schedule, beginner-level dialogue, Group discussion on etiquette.

Activities: Practice worksheets and flashcards for hiragana, Writing drills and reading simple katakana words, Dialogue practice for greetings and self-introduction, Sentence construction exercises with basic SOV structure, Particle usage exercises and short dialogues, Role-play scheduling, shopping, and telling time, Verb conjugation drills for common verbs, Descriptive sentence exercises using adjectives, Practice Q&A dialogues forming questions and negations, Kanji writing practice and quizzes for basic characters, Vocabulary tests and conversational practice on daily topics, Oral presentations and listening comprehension quizzes.

Weightage: Continuous Assessment: 100%

Methodology for Continuous Assessment: Assignments (30%), Quiz (10%) and Internal Examinations 60%

	CO Description	PO	PSO
CO1	Understand simple spoken Japanese in everyday contexts.	---	
CO2	Communicate with widely used Japanese words effectively.	PO9 (2)	PSO3(2)
CO3	Develop the skills necessary for self-directed learning and continuous improvement in Japanese language.	PO11 (1)	PSO3(2)

UC25F03	Korean – I	L	T	P	C
		1	0	2	1

Course Objectives:

- To impart fundamentals of the Korean language, including reading, writing systems, pronunciation, and speaking.

Fundamentals of Korean: Introduction to Hangul: consonants and vowels, Basic pronunciation and syllable formation, Common greetings and self-introductions, Numbers (Sino-Korean and Native Korean basics), Basic sentence structure (Subject-Object-Verb), Simple expressions (e.g., 감사합니다, 안녕하세요).

Activities: Writing and reading Hangul practice sheets, Pronunciation drills and audio repetition, Dialogue practice for greetings and self-introduction, Counting and number exercises.

Essential Grammar and Vocabulary: Particles (은/는, 이/가, 을/를) and usage, Basic verbs and present tense conjugation, Sentence patterns: affirmative, negative, interrogative, Common adjectives and descriptive sentences, Expressing possession and location, Asking simple questions (어디, 뭐, 누구).

Activities: Verb conjugation and sentence formation drills, Role-play conversations for shopping and daily routines, Descriptive writing and speaking exercises, Question and answer practice.

Everyday Korean Communication: Polite speech levels and honorifics introduction, Talking about time, dates, and schedules, Ordering food, shopping phrases, counting objects, Simple directions and transportation vocabulary, Listening practice with short dialogues, Cultural notes on etiquette and communication.

Activities: Role-play ordering at a restaurant or buying items, Listening comprehension exercises, Giving and asking for directions practice, Group conversations and presentations.

Weightage: Continuous Assessment: 100%

Methodology for Continuous Assessment: Assignments (30%), Quiz (10%) and Internal Examinations 60%

CO3	Develop the skills necessary for self-directed learning and continuous improvement in Korean language.	PO11 (1)	PSO3(2)

Semester – III

MA25C09	Computational Differential Equations	L	T	P	C
		3	1	0	4

Course Objectives:

- The Objectives of the course are to equip students with the ability to formulate and solve various types of Ordinary and Partial Differential Equations (ODEs & PDEs) and to develop proficiency in applying numerical methods and computational tools for solving differential equations encountered in engineering problems.

First Order Ordinary Differential Equations: Basic concepts of ordinary differential equations–Formation of first order differential equations from physical problems–First order and first-degree ODE: Variables separable–Exact equations–Leibnitz's equation – Bernoulli's equation – Numerical Methods: Solving first order ODE by Euler's formula, Taylor series and Runge Kutta method of 4^{th} order.

Activities: Application and Visualization of the first order ODE using open-source software and solving Competitive Examination questions

Higher Order Ordinary Differential Equations: Formation of second order differential equations from physical problems–Linear equations of second and higher order with constant coefficients – Euler's linear equations – Method of variation of parameters–Numerical Methods: Solving second order ODE by Runge-Kutta method of 4th order and finite difference method.

Activities: solving ordinary differential equations using open-source software and solving of Competitive Examination questions

First Order Partial Differential Equations: Formation of partial differential equations by elimination of arbitrary constants and arbitrary functions - Solution of PDE by variable separable method – Solution of standard types of first order partial differential equations (excluding reducible to standard types) – Lagrange's linear equation – Numerical Methods for first order PDE by Method of lines with Runge-Kutta method of order fourth.

Activities: Application and Visualization of the Partial Differential Equations using open-source software and solving Competitive Examination questions

Higher Order Partial Differential Equations: Linear homogeneous partial differential equations of second and higher order with constant coefficients. Numerical Methods: Finite difference techniques for the solution of two-dimensional Laplace's and Poisson's equations on rectangular domain—Solution of one-dimensional heat equation using Bender Schmidt and Crank Nicholson difference schemes—Solution of one-dimensional wave equation by explicit scheme.

Activities: Application of the second order PDE using open-source software of 1-D wave, 1-D heat equations, Laplace and Poisson equations and Solving Competitive Examination questions
Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%.
Assessment Methodology: Assignments (20%), Solution to application-oriented problems using software (20%), Solving Competitive Examination questions (20%), Internal Examinations (40%).

AI25301	Principles of Soil Science and Engineering	L	T	P	C
		3	0	2	4

Course Objective:

To develop understanding of soil science and engineering properties for analyzing soil behavior in agricultural and foundation applications.

Soil Fundamentals: Soil formation, profile, components, and physical properties including texture, structure, density, and plasticity; Soil water, air, temperature, colloids, pH, and nutrient interactions with emphasis on measurement techniques.

Practical:

1. Determination of soil pH and Electrical Conductivity (EC) using digital meters

Phase Relationships and Soil Compaction: Soil phase relationships and index properties. Gradation analysis and particle size distribution. Atterberg limits and indices. Engineering classification of soils (IS/Unified systems). Principles of soil compaction, factors affecting compaction, laboratory and field compaction methods.

Practical:

1. Grain size distribution analysis of soil using mechanical sieve shaker.
2. Determination of field density by Core Cutter and Sand Replacement method.
3. Determination of specific gravity of soil solids using Pycnometer.
4. Textural analysis of soil by International Pipette method.

Survey and Land Evaluation: Principles of soil survey and mapping - Land capability classification, suitability evaluation, and reclamation of problemetic soils.

Practical:

1. Determination of organic carbon content and estimation of gypsum requirement for reclamation of alkali soils.

Engineering Applications: Shear strength, permeability of soils with laboratory determination methods - Terzaghi's bearing capacity theory and BIS provisions - Slope stability analysis of infinite and finite slopes, friction circle method and slope protection measures.

Activity: Case study relevant to slope protection measures

Tasks:

1. Characterize and classify soils using laboratory and field tests, and interpret the results for agricultural and geotechnical applications.
2. Evaluate soil suitability and land capability for different engineering and agricultural purposes, including the assessment and reclamation of problematic soils.
3. Analyze the compaction, permeability, shear strength, and bearing capacity characteristics of soils and apply relevant BIS/IS provisions for engineering design.
4. Assess slope stability and recommend appropriate slope protection measures through

case studies and engineering analyses for safe and sustainable infrastructure development.

Weightage: Continuous Assessment: 50%, End Semester Examinations: 50%

Methodology for Continuous Assessment: Quiz (5%), Project (15%), Assignment Programs (25%), Practical (25%), Internal Examinations (30%)

	CO Description	PO	PSO1	PSO2	PSO3
CO1	Explain soil formation, properties, and physical behaviour.	-	-	-	-
CO2	Classify soils and evaluate land suitability using survey methods.	PO1 (3), PO2 (3), PO4 (3)	3	2	-
CO3	Determine soil index properties, compaction characteristics, and engineering classification through laboratory and field methods.	PO2 (2), PO4 (3), PO5 (3), PO6 (2), PO8 (2)	3	2	-

	CO Description	PO	PSO1	PSO2	PSO3
CO4	Analyze shear strength, permeability, bearing capacity, and slope stability of soils	PO1 (3), PO3 (3), PO4 (2) PO6 (2) PO8 (2)	3	1	1

CE25C02	Fluid Mechanics and Machinery	L	T	P	C
		3	1	0	4

Course objective:

To introduce fundamental principles of fluid mechanics and apply them to analyze and solve practical civil engineering problems.

Fluid Properties: Fluid properties - methods of analysis - system and control volume - pressure measurement

Fluid Statics: Forces on plane and curved surfaces - buoyancy, flotation, and metacentric height.

Activity: Construct simple floating models to study buoyancy, metacentric height, and hydrostatic forces.

Fluid Flows: Flow classification, streamline concepts, stream function, flow nets; conservation laws (mass, energy, momentum), continuity equation, Euler's and Bernoulli's equations, and applications to flow measurement and pipe bends. Laminar flow, Reynolds experiment, Hagen–Poiseuille equation, Darcy–Weisbach equation, Moody diagram, pipe losses, and pipes in series and parallel.

Activity:
Review of Competitive Exam questions on pipe flow, discharge/velocity calculations, and pipe losses.

Dimensional Analysis: Fundamental dimensions, dimensional homogeneity, Rayleigh's method, Buckingham Pi theorem, dimensionless parameters, similitude, model studies, and applications

Activity:
Quiz on dimensional analysis.

Boundary Layers: Boundary layer concepts, laminar and turbulent flow, momentum integral equation, drag, lift, separation, and control measures.

Turbines: Impact of jets, velocity triangles, rotodynamic machine theory, turbine classification, working principles of Pelton, Francis, and Kaplan turbines, work done, efficiencies, draft tube, specific speed, performance curves, and governing.

Activity:
Prepare a poster on turbine working principles, performance, and efficiency.

Pumps: Pump classification, centrifugal pumps, solar pumps - working principle, heads and efficiencies, velocity triangles, impeller work, performance curves; reciprocating pumps, indicator diagram, air vessels, and rotary pumps.

Activity:
Visit a pump installation or water treatment plant and prepare a report.

Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%

Methodology for Continuous Assessment: Quiz - 10%, Poster presentation - 15%; Report preparation from Site visit – 10%, Assignment – 15%, Internal Examinations – 50%

AI25302	Theory of Machines	L	T	P	C
		3	0	0	3

Course Objective:
To impart knowledge on kinematics and dynamics of mechanisms, gears, friction elements, and vibrations.

Kinematics of Mechanisms, CAMS: Kinematic pairs, chains, inversions, and analysis of mechanisms using graphical and analytical methods - Cam types, follower motion, displacement diagrams, and cam profile design.

Activity: Poster presentation on application of cams in agricultural machinery.

Gears, Gear Trains, Power Transmission: Gear geometry, tooth action, interference, and gear trains including epicyclic systems - Belt, rope, chain drives, clutches, brakes, and lubrication principles in power transmission.

Activity: Flipped class on high-performance polymer gears

Friction, Force Analysis: Friction in machine elements, lubrication regimes, and static force analysis using free body diagrams - Dynamic force analysis with inertia effects and application of D'Alembert's principle.

Activity: Seminar on Use of tribological coatings for friction reduction

Balancing, Vibration of Machines: Balancing of rotating and reciprocating masses and balancing machines - Free and forced vibrations, damping, critical speed, torsional vibrations, and vibration isolation.

Activity: Quiz on Smart vibration monitoring systems

Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%

Methodology for Continuous Assessment: Quiz - 10%, Poster presentation - 15%; Report preparation from Case study – 10%, Seminar report – 15%, Internal Examinations – 50%

	CO Description	PO	PSO1	PSO2	PSO3
CO1	Explain kinematic analysis of mechanisms and cam systems.	-	-	-	-
CO2	Analyze gear systems and power transmission mechanisms.	PO1 (3) PO2 (3)	3	2	-
CO3	Evaluate friction effects and perform static and dynamic force analysis.	PO1 (3) PO2 (3)	3	2	1
CO4	Analyze balancing and vibration characteristics of mechanical systems.	PO1 (3) PO2 (3)	3	1	1

CE25C03	Surveying and Geomatics	L	T	P	C
		3	0	0	3

Course objective:

To study the various methods of surveying and understand the concept of control, control and modern surveying and also to use various survey instruments

Levelling: Chain Surveying, Datum, benchmarks, levelling methods (fly and check), booking and reduction, contouring

Theodolite Surveying: Horizontal and vertical angle measurements - Temporary and permanent adjustments - Trigonometric levelling - Single and double plane methods – Stadia tacheometry - Subtense method - Tangential tacheometry.

Activity: Review of Competitive Exam Questions related to levelling and theodolite surveying.

Modern Surveying: Total station - components, working, errors, applications; Bathymetry, GPS - components, data acquisition, errors, applications; Introduction to drone surveying and LiDAR.

Activity: Case study report on GPS applications.

Control Surveying, Adjustment: Horizontal and vertical control, triangulation, traversing, trilateration, coordinate computation; errors, weights, and adjustment of observations.

Activity: Seminar on control surveying.

Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%

Methodology for Continuous Assessment: Quiz - 10%, Case study report – 20%; Seminar report – 20%, Internal Examinations – 50%

CE25C07	Fluid Mechanics and Machinery Laboratory	L	T	P	C
		0	0	4	2

Course Objective:

To provide hands on experience in calibration of flow meters, performance characteristics of pumps and turbines.

List of Experiments:

1. **Flow Measurement Devices**
   Calibration of rotameter and flow measurement using venturimeter/orifice meter/notches.
2. **Bernoulli's Theorem -** Verification of Bernoulli's equation.
3. **Losses in Pipes -** Determination of friction factor and minor losses.
4. **Pumps -** Performance characteristics of centrifugal and reciprocating pump.
5. **Turbines -**Performance characteristics of Pelton and Francis turbine.
6. **Metacentric Height -** Determination of metacentric height of floating bodies.

Tasks: (Perform any 2 tasks)

Task 1: Compare discharge values obtained from different devices and analyze errors.
Task 2: Evaluate major and minor losses in the system and Compare experimental results with theoretical/Moody chart values.
Task 3: Plot performance curves and determine the specific speed of a centrifugal pump
Task 4: Plot characteristic curves (H–Q, η–Q) and determine efficiency of a reciprocating pump.
Task 5: Assess stability conditions and compare with theoretical values.

Weightage: Continuous Assessment: 60%, End Semester Examinations: 40%

Methodology for Continuous Assessment: Project (30%), Assignment (10%), Practical (30%), Internal Examinations (30%)

CO – PO Mapping

	CO Description	PO Mapping	PSO1	PSO2	PSO3
CO1	Perform fluid mechanics experiments and obtain relevant measurements.	PO4 (3) PO5 (2) PO8 (2) PO9 (2)	2	2	1
CO2	Analyze experimental data to evaluate flow behavior, losses, and energy principles.	PO2 (2) PO4 (3) PO5 (2) PO9 (2)	3	2	1
CO3	Evaluate the performance of hydraulic machines and interpret results for practical applications.	PO2 (2) PO4 (3) PO6 (2) PO9 (2)	3	3	1

CE25C04	Surveying and Geomatics Laboratory	L	T	P	C
		0	0	4	2

Course Objective:

To provide hands on experience in calibration of flow meters, performance characteristics of pumps and turbines.

List of Experiments:

1. **Levelling Operations:** Fly levelling, check levelling, and benchmark transfer.
2. **Contouring and Mapping:** Grid levelling, contour mapping, and cut & fill volume estimation.
3. **Theodolite Surveying:** Measurement of horizontal angles by repetition and reiteration methods.
4. **Total Station Surveying:** Angle, distance, coordinate measurement, orientation, and resection methods.
5. **Height and Distance Measurement:** Determination of height using REM/trigonometric methods.
6. **GPS Surveying:** Navigation and feature collection using handheld GPS.

Tasks: (Perform any 2 tasks)

Task 1: Site Levelling and Earthwork Estimation: Perform levelling and contour mapping to estimate cut and fill volumes for a construction site.

Task 2: Precision Survey and Layout: Measure horizontal angles using theodolite methods and apply them for setting out a simple structure.

Task 3: Total Station Mapping: Conduct a topographic survey using Total Station and prepare contour and feature maps for planning.

Task 4: Height and GPS Survey: Determine heights using REM method and integrate GPS data for mapping infrastructure features.

Weightage: Continuous Assessment: 60%, End Semester Examinations: 40%

Methodology for Continuous Assessment: Project (30%), Assignment (10%), Practical (30%), Internal Examinations (30%)

EN25C03	English Communication Skills Laboratory– I	L	T	P	C
		0	0	2	1

Course Objectives:

- The objectives of the course are to foster students' confidence and fluency in professional and social communication and to bridge the gap between academic English and industry expectations.

List of Activities

A. Elements of Effective Speaking and Listening

(i) Sharing life experience/ turning point in their life – SATORI

(ii) Situational Conversation – eg. Talking to a Senior about Internship Tips

(iii) Welcoming a Guest Speaker at a Seminar

(iv) Pictography to represent data using images or symbols

(v) B2-C1 Listening exercises include lectures, interviews, and discussions.

B. Mastering Presentations

(i) Presentation Skills – Non-verbal communication

(ii) Mini-Presentations: Topics like "My Dream Project," "Engineering in 2050,"3-minute technical pitches with logical flow

(iii) Technical Presentations with PPT

C. Group Discussion Strategies:

(i) Introduction to Group Discussions - Key skills for effective participation

(ii) Phases in a GD and Conversational Phrases in GD.

(iii) Group Discussions – Abstract and Factual topics

D. Resume & LinkedIn Optimization

(i) Building LinkedIn Profile – Drafting headlines and summaries

(ii) Social Media Optimisation

(iii) Preparing Video Resume

E. Podcast-Based Language Learning:

(i) Listening to podcast (motivational, career oriented, success stories)

(ii) Podcast Preparation – Purpose – Topic – Structure – Recording Tips - Publication of the Podcast

F. Mock Interviews and Communication Strategies:

(i) Listening – Job interview

(ii) Speaking – Mock interviews

Weightage: Continuous Assessment: 60%, End Semester Examinations: 40%.

Internal Assessment: 1. Listening (20 marks)

2. Video Resume (20 marks)

3. Creating a Podcast (30 marks)

4. Mock interview (30 marks)

End Semester Assessment: 1. Presentation with PPT (50 marks)

2. Group Discussion (50 marks)

Semester IV

AI25401	Soil and Water Conservation Engineering	L	T	P	C
		3	0	0	3

Course Objective:

To impart knowledge on principles of soil erosion, sediment transport, and soil and water conservation measures for sustainable watershed management.

Soil Erosion Principles, Assessment: Soil erosion processes, types, and mechanics with estimation methods such as SCS-CN and USLE/RUSLE. Land capability, gully classification, permissible soil loss, and introduction to watershed modelling.

Activity: Assignment on soil erosion risk assessment

Agronomic, Mechanical Erosion Control Measures: Agronomic practices and mechanical measures including bunding, terracing, and waterways. Design and application of gully control structures for slope and watershed protection.

Activity: Field visit to a watershed/soil conservation structure

Water Conservation, Harvesting Techniques: In-situ moisture conservation, rainwater harvesting, micro-catchments; morphometric analysis for catchment yield estimation, Design of farm ponds, check dams, and integrated watershed management practices.

Activity: Poster presentation on smart irrigation systems.

Sedimentation, Watershed Sustainability: Sediment transport mechanisms, estimation, and reservoir sedimentation analysis. Sediment control methods and sustainability aspects of watershed systems.

Activity: Case study analysis of reservoir sedimentation problem and control strategies.

Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%

Methodology for Continuous Assessment: Quiz - 10%, Case study report – 20%; Seminar report – 20%, Internal Examinations – 50%

AI25402	Hydrology and Water Resources Engineering	L	T	P	C
		3	0	0	3

Course Objective:

To impart fundamental knowledge of hydrological processes including precipitation, runoff, groundwater, and reservoirs.

Precipitation, Abstractions, Runoff Processes: Hydrological cycle, precipitation measurement, rainfall analysis (Thiessen, Isohyetal), evaporation, infiltration, and runoff estimation (SCS-CN).

Hydrograph analysis, unit hydrograph, IUH, and stage–discharge relationships.

Activity: Poster presentation on Automatic Weather Stations

Hydrological Extremes, Disaster Management

Flood and drought analysis using frequency methods and probability distributions. Flood control measures, drought classification, NDVI analysis, and national programs (DPAP).

Activity: Case study analysis on flood/drought mitigation

Reservoir Planning. Management

Reservoir classification, site selection, general principles of reservoir design, spillway design concepts - Elevation–area–capacity relationships, sedimentation, and reservoir operation strategies.

Activity: Visit to a nearby reservoir

Groundwater Hydrology and Sustainable Management

Groundwater occurrence, aquifer properties, and flow equations. Well hydraulics, artificial recharge, rainwater harvesting, and conjunctive water use.

Activity: Flipped class on smart groundwater monitoring systems

Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%

Methodology for Continuous Assessment: Quiz - 10%, Case study report – 20%; Seminar report – 20%, Internal Examinations – 50%

AI25403	Applied Thermodynamics	L	T	P	C
		3	0	0	3

Course Objective:

To impart fundamental knowledge of thermodynamic laws, properties of pure substances and gas mixtures for engineering applications.

Fundamentals of Thermodynamics, First Law: Thermodynamic systems, properties, equilibrium, Zeroth law, temperature scales, and energy interactions - First law for closed/open systems, steady/unsteady flow processes, and applications to turbines, compressors, and nozzles.

Activity: Problem-solving assignment on First Law applications

Second Law, Entropy, Availability: Heat engines, refrigerators, Carnot cycles, and Second Law statements – Entropy (T–s diagram; Tds equations), irreversibility, availability, and second law efficiency with engineering applications.

Activity: Case study on power plant efficiency

Properties of Pure Substances, Gas Mixtures: Steam properties, thermodynamic diagrams, steam tables, and Mollier chart applications. Ideal/real gases, equations of state, compressibility, and corresponding states.

Activity: Numerical exercise using Steam Tables/Mollier chart

Thermodynamic Relations, Applications: Maxwell relations, TdS equations, Joule–Thomson effect, and Clausius–Clapeyron relation - Applications in power plants, refrigeration, exergy analysis, and energy audit concepts.

Activity: Seminar on exergy analysis of a simple thermal system

Weightage: Continuous Assessment: 40%, End Semester Examinations: 60%

Methodology for Continuous Assessment: Quiz - 10%, Case study report – 20%; Seminar report – 20%, Internal Examinations – 50%

AI25404	Integrated CAD Design in Agricultural Engineering	L	T	P	C
		0	0	4	2

Course Objectives:

To equip students with fundamental knowledge of Computer-Aided Design (CAD) tools and techniques for modeling, analysis, and drafting of agricultural machinery and farm structures.

List of Experiments

1. CAD Interface, 2D Drafting and Dimensioning
   a) Preparation of 2D drawings of agricultural components (shaft, bracket, flange)
   b) Dimensioning and annotation as per BIS standards

2. 3D Modeling and Parametric Design
   a) Modeling of components such as plough share, seed tube, sprocket, and pulley
   b) Parametric modeling of cultivator tine with design modifications

3. Assembly Modeling of Farm Machinery
   a) Assembly of seed drill unit (hopper, seed tube, frame, metering device)
   b) Application of constraints and interference checking

4. Motion Simulation of Mechanisms
   a) Simulation of slider–crank mechanism
   b) Analysis of displacement, velocity, and motion characteristics

5. Sheet Metal and Surface Modeling
   a) Modeling of grain storage bin/hopper with flat pattern development
   b) Surface modeling of tractor hood or curved guard

6. Finite Element Analysis and Tolerance Study
   a) Static stress analysis of cultivator shank or plough beam
   b) Clearance, fit, and tolerance analysis in assemblies

Tasks:

1. Design and model an agricultural machine component or system (e.g., seed drill unit, cultivator, or hopper) using CAD software, including assembly and basic FEA.
2. Perform motion simulation of a selected mechanism (e.g., slider–crank or gear system) and analyze its kinematic performance with interpretation of results.
3. Prepare a report on a real-world agricultural machinery system focusing on design, materials, manufacturing considerations, and scope for improvement using modern tools.

	CO Description	PO	PSO1	PSO2	PSO3
CO1	Develop 2D drafting and 3D part models of agricultural components using CAD tools.	PO5 (3) PO7 (3) PO8 (2) PO9 (2)	2	3	2
CO2	Create assemblies and perform basic motion/simulation analysis for agricultural engineering systems.	PO5 (3) PO8 (2) PO9 (2)	2	3	2

AI25405	Tractors and Farm Engine Systems	L	T	P	C
		3	0	2	4

Course Objective:

To impart knowledge on the construction, operation and performance evaluation of tractors, power tillers and earth moving equipment used in agriculture.

Tractor Engine and Engine Systems: Classification of tractors; construction and working of IC engines and components - Air, fuel, cooling, lubrication, and electrical systems with valve timing concepts.

Practical:

1. Study of engine components (diesel and petrol) and Dismantling and assembly of diesel engine.

Transmission, Steering and Braking Systems

Transmission systems – clutch, gear box (sliding mesh, constant mesh and synchromesh); differential, final drive and wheels; steering geometry and steering systems; front axle and wheel alignment; braking systems – types and working principles.

Practical:

2. Study of clutch and gearbox systems, steering, differential, and braking systems

Hydraulic Systems and Tractor Performance

Hydraulic systems – working principles, hydraulic pumps and control valves; three-point linkage; draft and position control; weight transfer; theory of traction and tractive efficiency; tractor chassis mechanics; longitudinal and lateral stability; operator controls, visibility and ergonomics; Power Take Off (PTO) system.

Practical:

3. Study of hydraulic system and three-point linkage mechanism – draft and position control operation.
4. Determination of tractor tractive efficiency / demonstration of weight transfer and traction characteristics.

Power Tillers, Bulldozers and Tractor Testing

Power tiller – special features, clutch, gear box, steering and braking systems; makes of tractors, power tillers and bulldozers; bulldozer – salient features, turning mechanism, track mechanism and operations; tractor and power tiller testing – types of tests, need for testing and evaluation; test codes for performance testing as per BIS/IS standards.

Practical:

5. Study of power tiller systems and tractor testing procedures

Tasks:

1. Design and analyze a tractor subsystem (engine, transmission, or hydraulic system) with detailed component study, working principles, and performance evaluation.
2. Conduct a study (experimental/demo/data-based) on tractor performance such as tractive efficiency, fuel consumption, or PTO performance and interpret the results.
3. Prepare a detailed report based on a field visit/workshop study covering tractor systems, power tillers, or bulldozers, including testing procedures and scope for improvement.

Weightage: Continuous Assessment: 50%, End Semester Examinations: 50%

Methodology for Continuous Assessment: Quiz (5%), Project (15%), Assignment Programs (25%), Practical (25%), Internal Examinations (30%)

CE25C08	Strength of Materials	L	T	P	C
		3	0	2	4

Course Objective:

This course provides a foundational understanding of stress, strain, and deformation in solids, while developing analytical skills to evaluate internal forces, deflections, and torsional behaviour in structural members, springs, and pin-jointed plane trusses.

Simple Stresses and Strains

Stress–strain concepts, Hooke's law, elastic constants, stress–strain behavior of materials, axial deformation.

Practical:

1. Tension Test on Mild Steel / HYSD Steel
2. Determination of Elastic Constants (E, G, v) using bar / torsion tests.
3. Hardness testing of metals using: – Brinell hardness test and Rockwell hardness test

Shear Force and Bending Moment: Beam types - loads (point load, UDL, UVL, effects of applied moments (concentrated and distributed) - SFD and BMD for cantilever, simply supported, and overhanging beams.

Activity: Review of Competitive Exam questions on SFD and BMD

Shear Force and Bending Moment: Beam types - loads (point load, UDL, UVL, effects of applied moments (concentrated and distributed) - SFD and BMD for cantilever, simply supported, and overhanging beams.

Bending and Shear Stresses: Bending theory, bending equation, stress distribution in beams and sections.

Practical:

4. Determination of ultimate shear stress of a mild steel rod by conducting a double shear test.
5. Determination of Young's modulus of a beam with rectangular cross section (metal and wooden specimens) by conducting deflection tests.

Deflection Analysis of Beams

Elastic curve and beam deflection, governing differential equation for beam deflection, double integration method, Macaulay's method, moment area method, conjugate beam method, application of these methods to compute slope and deflection of statically determinate beams.

Activity: Seminar on a beam deflection method

Torsion, Springs, and Trusses: Torsion equation and assumptions, analysis of solid and hollow circular shafts, torsional rigidity, combined torsion and bending, shafts in series and parallel; helical springs (open and closed-coiled); analysis of determinate and indeterminate pin-jointed plane trusses using method of joints, sections, and tension coefficient method.

Practical:

6. Open and Closed Coiled Helical Springs – Determine stiffness and deflection under load.

Tasks:

1. Plot SFD and BMD for different beam configurations using MS-EXCEL or equivalent open-source simulation tools.
2. Conduct/compile results from key lab tests (tension, torsion, beam deflection, spring test) and interpret material properties and structural behavior.
3. Design a simple structural/mechanical system (e.g., shaft, spring, or truss) considering strength, stiffness, and safety, and justify the design with calculations.

Weightage: Continuous Assessment: 50%, End Semester Examinations: 50%

Methodology for Continuous Assessment: Quiz (5%), Project (15%), Assignment Programs (25%), Practical (25%), Internal Examinations (30%)

CO – PO Mapping

	CO Description	PO Mapping	PSO1	PSO2	PSO3
CO1	Explain stress, strain, material properties, and elastic behavior of solids.	-	-	-	-
CO2	Analyze complex stress conditions, thermal stresses, and stress transformation using Mohr's circle.	PO1 (3), PO2 (3), PO4 (3)	3	2	1
CO3	Evaluate shear force, bending moment, and stress distribution in beams.	PO2 (2), PO4 (3), PO5 (3)	3	2	1
CO4	Apply concepts of torsion, springs, and trusses for structural analysis and design.	PO1 (3), PO3 (3), PO4 (2)	3	2	2

EN25C04	English Communication Skills Laboratory– II	L	T	P	C
		0	0	2	1

Course Objectives:

- The objectives of the course are to build students' advanced communication skills for workplace readiness and develop intercultural competence for effective collaboration in global and virtual teams. Prepare students for competitive exams with focused skill-building and test-oriented practice.

List of Activities

Stage Ready – Impactful Public Speaking .

(i) Simulate a formal event such as an academic conference, convocation, or awards ceremony, where students roles including Master of Ceremonies (MC), Role as a dignitary, and a Commentator

(ii) Visual Prompt Storytelling: Use random images to create spontaneous stories, focusing on plot, setting, and character,

(iii) **Digital Presentation - Record** a short video explaining a project or technical concept, using slides, voiceover, and visual aids (to be uploaded using google classroom or drive link)

Professional and Application-Oriented Writing

(i) Résumé Preparation: Design ATS-friendly résumés tailored to various job descriptions, using action verbs and quantifiable impact. ·

(ii) Design engaging content for poster presentation relevant to their domain.

Receptive Skills in Workplace Communication·

(i) Reading articles related to their domain and discuss in groups

(ii) Visit company websites, make inferences and present in the class

(iii) Listen to recorded mock interviews and take detailed notes. Summarise key points and action items in a professional format and make a presentation.

Intercultural Communication

(i) Assertive vs Aggressive communication

(ii) Role play activities – workplace communication in intercultural/crosscultural contexts

From Campus to Career: Industry Skills and Global Exam Preparation

(i) Participate in HR interviews using AI tools or peer interviewers, responding to behavioural questions using methods like STAR (Situation, Task, Action, Result)

(ii) Practice Verbal Ability in competitive exams like UPSC, SSC, CDS, TNPSC, etc.

Weightage: Continuous Assessment: 60%, End Semester Lab Examinations: 40%.

Internal Assessment Methodology: 1. Oral story telling using visual prompts (30 marks)

2. Poster presentation (40 marks)

3. ATS resume writing (30 marks)

End Semester Assessment:

1. Interview (50 marks)
2. Verbal Ability test (50 marks)
   (students must bring the resume but evaluation must be done based on the performance in the interview)
